

We have a Fibromyalgia product with 7 patents for the way it is produced. We have clinical studies that 3 out of 4 people with Fibromyalgia will go into remission with this product. Our product contains a pentose-5 phosphate sugar completely safe for people with or without diabetes. Most products use a pentose-6 phosphate sugar which is not recommended for people with or developing diabetes. Clinical studies prove that our product also helps for cardiac myopathy. Increased sports performance and faster recovery after exercise are some other benefits of our product.

Fibromyalgia is not diagnosed through any lab tests or blood results. The only way is through physically pushing on 18 different pressure points throughout the body. Fibromyalgia is diagnosed if 12 of the 18 points result in elicit and severe pain. Do not waste thousands of dollars on lab or blood tests that can not diagnose Fibromyalgia. I am certified to perform blood work but I will not take your money for useless tests that can not diagnose Fibromyalgia.

The nutritional industry is very confusing because there are no federal regulations on supplement production or quality. I am here to educate consumers about products that are backed by clinical documentation. I compile research and seek products from all over the world to ensure the best for my consumers. Log into my educational system and I will assist you with you health care needs.

One container is a 6 week supply and costs a mere \$55 plus shipping and handling per container. For orders of 12 containers or more, shipping is free except Alaska and Hawaii.

Please contact me at [doctorofthefuture1@yahoo.com](mailto:doctorofthefuture1@yahoo.com) for questions and to place orders.
